

Glo Brite® Exit Signs Framed & Unframed

Glo Brite® Exit Signs are the next generation in exit sign technology.

Recent advancements in photoluminescent pigments and compounds have prompted UL to address testing of photoluminescent exit signs to the UL 924 Emergency Lighting and Power Equipment standard. Glo Brite® Exit Signs are listed to UL 924 through UL®.

Glo Brite® Exit Signs are NON-TOXIC and NON-RADIOACTIVE. Designed to glow in total darkness, these photoluminescent signs absorb and store energy from ambient fluorescent light. This energy is immediately visible in the event of a blackout or smoky conditions.

The main advantage of Glo Brite® Exit Signs is that there are no internal lights to burn out, making these signs 100% reliable and virtually maintenance-free. Our signs are non-electric, consuming no electricity, and installation is easy and low-cost. Because Glo Brite® Exit Signs are explosion-proof, they can be used in sensitive areas requiring explosion-proof exit signs.

FEATURES

- Consumes no electricity
- 100% reliable, no internal parts to burnout
- Non-toxic, non-radioactive
- Low-cost, easy installation
- Flexible design for surface, flag or ceiling mounting
- Thin, low profile
- Can be used for both high-level and low-level applications
- Consistent, uniform, High Visibility Green illumination
- Removable or field applied chevron arrows for directional indication
- Maintenance-free 25+ years
- Listed to UL 924 through UL®, meets NFPA Life Safety Code 101 and OSHA requirements
- Meets current Building Codes: IBC, ICBO, BOCA and SBCCI, NFPA 5000
- ICC ES report #ER-6040
- California State Fire Marshall listing #6200-1617; 100
- City of Los Angeles Research Report: RR 25531 (CSI #16530)
- Ontario Building Materials Evaluation Commission Authorization Report BMEC # 03-12-291
